NEW INDIA LITERACY PROGRAMME

A LEAP FORWARD TO ACHIEVE TOTAL LITERACY

Dr. Shubhankar Mishra

The opportunity to attain foundational literacy, obtain an education, and pursue a livelihood must be taken as the basic right of every citizen. Literacy and Basic education are powerful force multipliers that greatly enhance the success of all developmental efforts. They open up whole new worlds of personal, civic, economic, and lifelong-learning opportunities for individuals. Sincere efforts have been made to eradicate illiteracy in the country over the years, resulting in substantial progress towards enhancing access to adult education and lifelong learning. However, India still has considerably high number of illiterates. The Sustainable Development Goal 4.6 of the United Nations aims at ensuring that by 2030, all youth and a substantial proportion of adults, both men, and women, achieve literacy and numeracy. It is

therefore imperative that the country should eliminate illiteracy and achieve 100% literacy by 2030.

In line with National Education Policy 2020, the Union Cabinet has approved a new scheme of Adult Education, namely the 'New India Literacy Programme' (NILP) for financial years 2022-2027, with a financial outlay of Rs. 1037.90 crore. As per the approved scheme, the term 'Adult Education' has been substituted with 'Education for All' to accommodate all non-literates of 15 years and above age group suitably as the term 'Adult Education' is generally perceived as education of adults/elders/old age people. Hence, as envisioned, 'Education for All' would be used in place of 'Adult Education' now onwards.

UNESCO defines literacy as "the ability to identify, understand, interpret, create, communicate and compute,

using printed and written materials associated with varying contexts." On the other hand, International Literacy Association (ILA) defines literacy as "the

ability to identify, understand, interpret, create, compute, and communicate using visual, audible, and digital materials across disciplines and in any

context." The ILA definition of literacy has been adopted for implementing the NILP scheme as it is the sum total of the present day and future literacy requirements in the Indian context.

The NILP is a pathbreaking scheme. It has an innovative approach to leveraging technology in its implementation process, enhancing the sustainability of literacy activities, especially in this pandemic-Covid 2019 scenario.

The scheme's objective is to impart not only Foundational Literacy and Numeracy (FLN) but also to accommodate the different learning needs of learners and equip them to develop sustainable and critical life skills for their professional requirements. Broadly, the thrust of the scheme is not merely confined to impart 3R's. i.e.,

What Is Higher Education?

India's higher education system is the world's third-largest in terms of students, next to China and the United States. Higher education is defined as further education after high school completion. It is considered the third level of education after you leave school.

The term 'higher education with respect to India denotes the tertiary level education that is imparted after 12 years of schooling (10 years of primary and secondary education and 2 years of senior secondary education). Higher education begins with post-senior secondary education in learning institutions. The completion of higher education results in a degree, diploma, or certificate. The institutions that provide education in higher studies are universities, colleges, and various professional schools.

It includes the fields of Law, Medicine, Business, Music, Art, Social Sciences, and many more. Higher education also comprises teacher training

schools, junior colleges, and technology institutes. The minimum eligibility to gain higher education is the completion of senior secondary education and an entrance age above 17/18 years. Teachers in higher education commonly aim to develop their students' way of thinking, among others, and teaching in higher education is a faculty development space.

The world of education continues to evolve and has transformed leading to numerous growing trends in the learning

space. The advent of technology has brought about many changes in our daily lifestyle and our mindset. It has opened the doors and windows of opportunities and new ideas and has enabled us to think beyond the conventional career paths and consider the new-age careers of today, for a living.

The structure of Indian Higher Education is three-layered, consisting of Universities, Colleges and Courses.

On the basis of management, the universities are classified as:

- **Central Universities:** These are set up through an Act in Parliament. The establishment and operation are funded by the Union Government.
- **State Universities** - These are set up through an Act in the State Legislature. The state universities are primarily funded and operated by the State Government.
- **Private Universities** - These are set up through an Act in the State Legislatures. It includes specialized institutions and multidisciplinary research universities that are privately funded.

NEW INDIA LITERACY PROGRAMME ...

Reading, Writing, and Numeracy, but to cover other components that are necessary for the holistic and sustainable development of learners. Under the scheme, Foundational Literacy and Numeracy will be imparted through Critical Life Skills to the non-literates in the age group of 15 years and above through online mode by Online Teaching, Learning and Assessment System (OTLAS). The duration of this module will be 200 hours.

The scheme would be implemented in rural and urban areas of all districts of the States and UTs from 1st April 2022 onwards with a timeframe of five years. The scheme would cover all the districts, sub-districts, blocks, towns, gram panchayats, wards, and villages wherever non-literates of 15 years and above are present. However, the State Government/UT Administration has been given liberty to prioritize the districts/areas for implementing the scheme.

The National Education Policy 2020 on Adult Education and Lifelong Learning at para 21.4 states that "Strong and innovative government initiatives for adult education - in particular, to facilitate community involvement and the smooth and beneficial integration of technology - will be effected as soon as possible to expedite this all-important aim of achieving 100% literacy."

Union Budget Speech 2021-22 (Part-A) mentions important initiatives on education. Among others, it also provides in particular "To enable increased access of resources, online modules covering the entire gamut of adult education will be introduced."

The scheme has five components, namely Foundational Literacy and Numeracy including Reading, Writing and Numeracy, Critical Life Skills, like Financial Literacy, Legal Literacy, Digital Literacy, Disaster Management, Commercial Skills, Child Care and Education, Health and Family Welfare issues, awareness on dietary habits, exercise, yoga, cessation of tobacco use, first aid care and management of road traffic accident, etc.; Basic Education including preparatory, middle, and secondary stage equivalency, Vocational Skills to acquire requisite skills enabling them to get local employment and Continuing Education to learners of 15 years and above age group in the country which includes engaging holistic adult

education courses in arts, sciences, technology, culture, sports, recreation, as well as other topics of interest or use to local learners on as more advanced material on critical life skills.

As envisioned in the scheme, the acquisition of critical life skills, vocational skills, and continuing education will primarily be actualized through convergence with relevant ministries/departments at the central and state/UT level and creating/adapting suitable material for the same.

5 crore non-literates will be targeted in five years, i.e., 2022-27 @ 1.0 crore learners per annum. Foundational Literacy and Numeracy (FLN) would be imparted along with Critical Life Skills. In addition, under Basic Education Component, 1.0 lakh neo-literates yearly will be targeted to enhance their literacy level and provide them equivalency levels.

At national level, National Literacy Mission Authority (NLMA), Department of School Education & Literacy, Ministry of Education and at state level State Literacy Mission Authority

(SLMA) of respective states will be the coordinating agencies to implement the scheme duly supported by the various other institutions to augment the pace of teaching-learning activities across the country.

The scheme will be implemented through volunteerism and online mode. The school will be the unit for the implementation of the scheme. School students of Class-V and above who will handhold the non-literate members of their own family will play the role of volunteers. However, School students who do not have any non-literate in their family will also be encouraged. Besides, Pre-service students in Teacher Education Institutes (M.Ed./ B.Ed./ D.El. Ed./B.T.C./ J.B.T., etc.) under NCTE shall teach 3-4 non-literates every year for which credit framework will be worked out. Community members, including from that of Higher Education Institutes, volunteers from Nehru Yuva Kendra Sangathan (NYKS), National Service Scheme (NSS), National Cadet Corps (NCC), volunteers from CSOs, community, housewives, Anganwadi workers, teachers, Panchayati Raj Institutes (PRIs), and other institutions shall also be

encouraged. About 3 crore students of around 7 lakh schools registered under Unified District Information System for Education (UDISE) and about 50 lakh teachers of Government, Aided, and private schools, and an estimated 20 lakh students from Teacher Education and Higher Education Institutions will also be actively involved. All material and resources shall be provided digitally to registered volunteers through easily accessible digital modes, viz, TV, radio, cell phone-based free/open-source Apps/portals, etc. The existing ICT and other infrastructure in schools and higher education institutions, Common Service Centres (CSC), community centres, etc., will be utilized.

Priorities to the age cohorts of 15-35 will be saturated first, followed by the age group of 35 and above. In terms of categories, priority will be given to girls and women, SC/ST/OBC/ Minorities, Persons with Special Needs/Divyangjans (Disabled persons), Marginalized/ Nomadic/ construction workers/ labourers, etc. and who can substantially and immediately benefit from

adult education. In terms of location/area, the focus of the scheme shall be on all aspirational districts of NITI Aayog, districts with literacy rates less than the National/ State average, districts with female literacy rates less than 60% as per the 2011 Census, and districts/ blocks with large SC/ST/Minority population. In addition, educationally Backward Blocks and Left-Wing Extremism Affected districts will also be covered.

Being a non-literate member of a community has innumerable disadvantages, hence the importance of literacy cannot be undermined. Moreover, worldwide data on nations indicate high correlations between literacy rates and per capita GDP. Therefore, through this initiative, the Government of India is committed to achieving the goal of Total Literacy by 2030, transforming India as 'Nav Bharat: Saakshar Bharat.'

National Education Policy 2020

Transforming India as a Global Knowledge Hub

Dr. Rajesh Kumar

Indian education system is witnessing significant reforms with the advent of National Education Policy 2020 (NEP 2020). The policy framework envisions a comprehensive roadmap from school to higher education system in the 21st Century, which is more experience and discussion based, investigation-driven and student centric. NEP 2020 envisages the idea of holistic and multidisciplinary approach, flexible teaching, learning and evaluation process through multiple-entry exit, and eradication of boundaries between various academic disciplines, activities and streams to promote unity and integrity of all knowledge.

The focus on conceptual understanding, creative and critical thinking with three language formula, emphasis on ethical and constitutional values, respect for local and diverse cultures, life skills, extensive use of new information and communication technologies and role of a teacher as a reformer are important aspects in the policy framework which will bring a sea change in Indian education system. NEP 2020 connects links with indigenous knowledge to the international education system and its various provisions may be elucidated as:

Holistic and Multidisciplinary Approach: The concept of holistic and multidisciplinary approach eliminates rigid boundaries between academic disciplines in education system that has been in existence for decades. It emphasizes on unity and integrity of all disciplines for knowledge creation and dissemination and empowers students through flexibility in academic programs such as science with humanities, social sciences, languages, professional skills, soft skills, ethical and constitutional values. This approach makes students understand the importance of human life and its objectives from various perspectives. It aims to develop all capacities of human beings such as intellectual, aesthetic, social, physical, emotional and moral in an integrated manner, which will serve for the betterment of an individual, society, nation and the world.

NEP 2020 proposes significant reforms in higher education by transforming them into multidisciplinary universities/institutions by 2040 and recommends to establish one large multidisciplinary institution in every district in the country by 2030. To meet these goals, all single-stream institutions shall be converted into multidisciplinary institutions or will become part of vibrant multidisciplinary higher education institution clusters. It will be further classified into Research Centric Universities (RCU) and Teaching Centric Universities (TCU). Here, the role of a teacher as a reformer is paramount who will shape the future of the nation. The policy recommends various ways to improve teacher education, recruitment, deployment, service conditions, empowerment and motivation of teachers.

Multiple-Entry Exit (MEE): The policy highlights multiple entry-exit system in the academic programs in higher education, which opens up immense possibilities for the students. This system has been organized in a series of levels which range from level 5 to 10 that allows a student to enter and exit at various levels and accordingly certificate, diploma and degree shall be awarded with required credits. It is a visionary initiative in a country like India, where the dropout rate is high in the higher education in general and school level in particular due to various reasons such as financial constraints, family issues and medical problems etc. This flexible system allows a student to join academic programs for the next level throughout his/her life.

Levels	Qualification Title	Semesters	Credit
Level 5	Undergraduate Certificate	II	36-40
Level 6	Undergraduate Diploma	IV	72-80
Level 7	Bachelor Degree	VI	108-120
Level 8	Bachelor Degree (Honours/Research)	VIII	144-160
Level 8	Post Graduate Diploma	II	36-40
Level 9	Master's Degree (after obtaining Bachelor's degree)	IV	72-80
Level 9	Master's Degree [after obtaining Bachelor's degree (Honours/Research)]	II	36-40
Level 10	Doctoral Degree	VI-XII	As per Ph.D Regulations

According to All India Survey of Higher Education 2019-20, Ministry of Education, Govt. of India, the Gross Enrolment Ratio (GER) in Indian higher education is 27.1%, which is to be raised to 50% by 2035 in order to meet the level of the global higher education system. Whereas, NSSO survey 2017-18 expressed concern over the status of drop out students in schools by pointing out the number aged between 6 to 17 years is 3.22 crores. Bringing them back and preventing further drop out from the school system is top priority. NEP 2020 targets to achieve 100% GER in preschool to secondary level by 2030 and 50% GER in higher education by 2035.

Academic Bank of Credits (ABC): One of the key provisions of the policy framework is Academic Bank of Credit (ABC), which facilitates students for multiple entry exit in higher education. It is a virtual/digital database which enables students to open their account and provide them an opportunity to store their credits, which may be used for higher education at any point of time in their life. ABC preserves the information of the credits and empowers students to choose academic programs as per their choice to attain Degree or Diploma or Certificate through multiple entry and exit mode. It allows flexibility of any-time, any-where and any-level of learning throughout the life.

Multilingualism Model for Education: It is one of the most important aspects that has been highlighted in the NEP 2020. The policy framework emphasizes

multilingualism in teaching, and learning process from school to higher education system in order to inculcate conceptual understanding, creative and critical thinking among learners. Three-language formula shall continue in the process of knowledge creation and dissemination and students shall be encouraged to learn one or more languages apart from their home language/mother tongue/local language/regional language in an enjoyable manner and various tools of information and communication technology shall be used for the purpose.

Further, medium of instruction of teaching and learning shall be bilingual in and outside the classrooms and high-quality text-books, audio-video and e-content shall be made available in multiple languages in order to meet the aspirations of the people, region and the union. Creation of such content has already been initiated by National Program on Technology Enhanced Learning (NPTEL) in various languages-Hindi, Bengali, Gujarati, Kannada, Malayalam, Marathi, Tamil and Telugu. NPTEL is a joint venture of the IITs and IISc, which is funded by the Ministry of Education (MoE), Govt. of India. This initiative will promote various cultures through languages and will inculcate a sense of belongingness among people, which will strengthen national unity and integrity.

Online and Digital Education: The pandemic of Covid-19 has affected human civilization across the world. However, it has also paved the way for alternative modes of teaching, learning and evaluation process through various information and communication technology based platforms such as Zoom, Google meet, Google class, WhatsApp and many more in the education system. ICT enabled teaching and learning process has laid the foundation for online/digital education as per the mandate of Digital India. NEP 2020 envisages future possibilities in online/digital education and proposes carefully designed online courses by evaluating its pros and cons through pilot studies by appropriate agencies/institutions like NETF, CIET, NIOS, IGNOU, IITs and NITs etc.

Simultaneously, the policy framework encourages to optimize and expand existing digital platforms and ongoing ICT-based educational initiatives. In this regard, eradication of digital divide through concerted efforts for digital infrastructure such as availability of computing devices, internet facilities and digital literacy under the Digital India campaign is a must in every nook and corner of the country.

Further, e-learning platforms such as SWAYAM (Study Webs of Active-Learning for Young Aspiring Minds) for higher education, DIKSHA (Digital Infrastructure for Knowledge Sharing), SWAYAMPURABHA (32 High Quality Education Channels through DTH) initiatives of the Ministry of Education, Govt. of India will be extended to the next level of teaching, learning and evaluation process.

These platforms shall be entrusted with to develop virtual labs for equal access and quality practical components to the students. Simultaneously a digital repository of content creation and dissemination shall be developed for coursework, games and simulations, augmented reality, virtual reality, artificial intelligence and machine learning etc. To meet these goals, an autonomous body, the National Education Technology Forum (NETF), will be established for standardization of content, technology, pedagogy planning and administration for online/digital teaching, learning and evaluation.

National Research Foundation (NRF): Knowledge creation and research is pivotal for any Knowledge based Society and has utmost importance for growing and sustaining in the global scenario. A robust ecosystem of research for attainment of intellectual wealth by creating new knowledge is the need of the hour. In global scenario, the research and innovation investment in United State of America is 2.8%, Israel (4.3%) and South Korea (4.2%), whereas in India it is only 0.69% of the GDP. India has to expand significantly in output based research across disciplines in the near future.

The policy envisions a far-reaching approach for revamping research and innovation landscape in India by creating a National Research Foundation (NRF), which will act as a nodal body to fund competitively, peer-reviewed grant proposals of all types of institutions and across all the disciplines. It will act between various stakeholders such as researchers, government and industry so that research may be conducted as per need of the society and nation as well. NRF will also recognize outstanding research and progress.

Arrival of Foreign Universities: NEP 2020 has highlighted the need for internationalization of higher education and has recommended allowing top foreign universities to establish their campuses in India. Accordingly, a survey titled 'Establishing International Branch Campuses in India' was conducted by the National Institute of Educational Planning and Administration (NIEPA), Govt. of India in 2020-21. The survey shows that eight (8) foreign universities are interested in the Times Higher Education World University Ranking 2021. Five (5) out of eight (8) universities are from the United States of America and one (1) each from the United Kingdom, Australia and Canada.

In Union Budget 2022, Finance Minister Nirmala Sitharam announced that foreign universities will be allowed to operate from Gujarat International Finance Tec-City (GIFT) at Gandhinagar, which will be free from domestic regulations. The arrival of foreign universities will pave the way for establishment of 'Global Knowledge Hub' in India.

Regulatory Framework for Higher Education: Indian higher education system has witnessed heavy handed regulations for decades through multiple attempts with little output. There has been lack of coordination among various regulators, thereby leading to conflict of interests and lack of accountability. NEP 2020 strongly recommends for complete overhauling of the regulatory framework by creating four institutional structures carrying out four essential functions independently under one umbrella i.e., the Higher Education Commission of India (HECI).

Padhe Bharat, Badhe Bharat

Foregrounding Foundational Literacy and Numeracy

Reading is essentially a process of making meaning i.e., comprehension. Reading is an interaction between the text and the reader which is shaped by the context-the reader's prior knowledge, experience, attitude and language of community which is culturally and socially situated. The reading process requires continuous practice, development and refinement. Additionally, reading requires creativity and critical analysis.

Reading has always been recognised as a key component of a sound educational programme. Recognising that the existing school plans of many school systems do not ensure a child's acquisition and proficiency over reading skills, the Ministry of Education has initiated a nationwide- 'Padhe Bharat, Badhe Bharat' as a sub-programme to erstwhile Sarva Shiksha Abhiyan (SSA) and continued under the new integrated scheme Samagra Shiksha.

What is Padhe Bharat, Badhe Bharat programme?

Padhe Bharat, Badhe Bharat (PBBB) aims to improve language development to create an enduring interest in reading and writing with comprehension as a lifelong activity. It is based on the premise that children need meaningful and socially relevant engagement with books, along with various opportunities to actively and purposefully engage with a variety of print-based reading and writing activities.

The National Curriculum Framework, 2005 has clearly pointed out that a majority of children have a sense of fear and failure regarding Mathematics, which is why they give up early on, and drop out of serious mathematical learning. It was observed that the tendency embedded in teaching was to accelerate children's mathematical skills by teaching them mechanical rules at the expense of understanding and intelligent application. Therefore, a need was felt to help the children learn mathematics in a way that develops liking and understanding of the subject right from their early years of schooling.

Thus, Padhe Bharat, Badhe Bharat follows a twin track approach: to improve language development by creating an

enduring interest in reading and writing with comprehension, and to create a natural and positive interest in mathematics related to the physical and social world. In other words, the programme focuses on **Early Reading and Writing with Comprehension and Early Mathematics.**

Objectives of PBBB

1. To enable children to become motivated, independent and engaged readers and writers with comprehension possessing sustainable and lasting reading and writing skills and achieve learning levels appropriate to the class of study;
2. To make the children understand the reasoning in the domains of number, measurement and shapes;

3. To associate reading and writing with the experience of joy and real life situations; and
4. To recognize the social perspective of home-school transition and the role of children's literature in the process of building independent and engaged readers and writers.

These objectives are being realised by:

- a) Initiating a dialogue with teachers, head teachers, parents, educational administrators and policy makers to bring attention to the pedagogy of reading and writing; and early mathematics;
- b) Creating sensitisation about the needs of children of classes I and II with reference to meaningful processes of reading and writing and early mathe-

matics;

- c) Creating a cadre of resource groups and teachers well acquainted with pedagogy of reading and writing ; and early mathematics; and

Books not only impart knowledge but also shape personality and life and that the hobby of reading books leads to a wonderful satisfaction.

गुरु नन्द

- d) Creating classroom and school environments conducive and vibrant to early reading and writing experiences ; and early mathematics.

How is it being implemented?

Three factors-the text, the reader, and the context-both the setting where the reading, writing and oral language activity happens and also the manner in which these are transacted are critical to make any reading / writing / speaking a meaningful or meaningless experience. Similarly the context of problem solving exposed by the reader provides better appreciation of numbers and spatial understanding. Considering these factors the programmes are composed of various components towards implementation.

States and Union Territories are implementing PBBB using multiple strategies and approaches. These include adoption of NCERT model of early reading, provision of supplementary reading material, development of State specific models for early mathematics and early reading, collaboration with organizations like UNICEF, etc.

PBBB Library Grant and Promotion of reading

In order to inculcate reading habit among students of all ages, strengthening of school libraries is being undertaken through provision of books by providing library grants for government schools. The fund for library grant ranges from Rs. 5000/- to Rs. 20000/- based on the category of the school.

The old guidelines on library grant have also been revised recently. The present guidelines, dated 28th October 2021, emphasize on the promotion of reading as a whole apart from development of libraries and procurement of library books and the activities that can help achieve these goals. Further, the recommendations of National Education Policy (NEP) 2020 were also considered while framing the present guidelines.

Padhe Bharat Campaign

In January 2022, the Union Education Minister Shri Dharmendra Pradhan launched a 100-days reading campaign 'Padhe Bharat'. The launch of the campaign was in alignment with the NEP 2020 which

emphasizes on promotion of joyful reading culture for children by ensuring availability of age appropriate reading books for children in local/mother tongue/regional/tribal language.

Padhe Bharat campaign focused on children studying in Balvatika to Grade 8. The objective of the reading campaign, organised till April 10,

celebrated with the activity of Kahani Padho Apni Bhasha Main (Reading story in own language) across the country by encouraging children to read in their mother tongue/local language.

This campaign was aligned with the vision and goals of Foundational Literacy and Numeracy mission.

What is Foundational Literacy and Numeracy mission?

The Department of School Education and Literacy launched the National Mission on Foundational Literacy and Numeracy called National Initiative for Proficiency in Reading with Understanding and Numeracy (NIPUN Bharat) in 2021 under Samagra Shiksha. The Mission aims to achieve universal foundational literacy and numeracy in primary classes. The Mission Guidelines lays down priorities and actionable agendas for States and UTs to achieve the goal of proficiency in foundational literacy and numeracy for every child by grade 3. Detailed guidelines for the Mission have been developed which includes the codification of development goals and learning outcomes for ages 3 to 9 years and Lakshya or Targets for Foundational Literacy and Numeracy starting from Balvatika to Grade III.

To achieve this, a specialized National Initiative for School Heads' and Teachers' Holistic Advancement (NISHTHA 3.0) for the foundational literacy and numeracy, covering about

2022, was to have participation of all stakeholders at national and state level including children, teachers, parents, community, educational administrators, etc. One activity per week per group was designed with the focus on making reading enjoyable and building lifelong association with the joy of reading.

A unique feature of the Padhe Bharat campaign was the attention given to the Indian languages, including mother tongue/local/regional languages. It is in this regard, 21st February which is celebrated as International Mother Tongue Day, was also integrated with this campaign. The day was

25 lakh teachers at the primary level across all States and UTs, has been launched in September, 2021.

The National Education Policy 2020 states that "Our highest priority must be to achieve universal foundational literacy and numeracy in primary schools by 2026-27. The rest of this Policy will be largely irrelevant for such a large portion of our students if this most basic learning (i.e., reading, writing, and arithmetic at the foundational level) is not first achieved."

HIGHER EDUCATION TO JUMPSTART ...

- **Deemed Universities** - These are well-performing institutes that are declared to be of equal standing as the universities by the Central Government on the advice of the University Grants Commission (UGC).
- **Institutes of National Importance (INI)** - These are eminent institutions in India that are known to develop highly skilled individuals. They are funded by the Government of India and include all the IITs, NITs and AIIMS institutes.
- The colleges enabling higher education in India can be affiliated either with Central or State universities. The private colleges are mostly affiliated with State universities. Further, there are autonomous colleges as well that enjoy autonomy in terms of deciding curriculum, admissions and examination process. But they are also affiliated with a government university (Central or State).

Importance of Higher Education

In the 21st century, a college education is crucial for success.

The world is changing. Technology is developing beyond our wildest dreams, and complex issues in business, environment, and politics continue to challenge our society. Higher education prepares students to meet these challenges with grit and determination. A college education is more than classroom instruction. It is a holistic journey that explores facets of individuality, perseverance, and skill. A degree is about learning how to think, communicate, and deliver. More realistically, it can be considered as a transformation - from potential to realization.

A person chooses higher education when he wishes to specialise in his study stream. A prosperous career, financial security and higher growth opportunities are some of the benefits of higher education. With higher education, a person becomes more employable with specialised skills.

Higher education provides a gateway to a number of opportunities in the future. It has become very popular in the present scenario when live classes are not possible. It also promotes higher-order thinking skills in students, enhances their subject learning, encourages collaboration, improves knowledge retention, engages in discussion, and many more. Today Artificial Intelligence, Data Science, Machine Learning, and similar other techniques are playing a major role in almost every domain. The present challenges can be met when students understand the importance of Leadership in Higher Education.

Higher education is important in one's life:

1. Jumpstart Your Career

If you joined your organisation

at the most basic level and you are ambitious to grow up the ladder, you need supportive skills. These extra skills are gained by putting in your time and energy in a course that gives you extra edge to soar higher in your career ladder.

2. Higher Skill Gain

All the skills and specialisations derived from higher education help a person to explore unexplored territories and achieve higher excellence in life.

3. Intellectual Development

The more you study, the more you broaden your horizon and hence your perspective undergoes a serious transformation. A person who has completed higher education certainly has a better perspective and ideas to help in community and societal development and has the capability to build a citizen friendly nation.

4. Deep Knowledge

Higher education offers you complete knowledge. Professors and teachers will teach you all the basics related to your subjects. You will get both theoretical and practical knowledge.

Career options which will define the following decade:

If you don't know what Master's degree to study and you feel blocked, without a clear idea about your future career path. To save you from the dilemma of choosing the right career for the future, and give you something to think about, here is a list of careers that will define the following decade:

Computer Science degrees - learn to speak "machine" and improve the web

We are living in the digital era. Global companies from anywhere in this world have a high demand for computer geniuses, and, for this reason, most universities provide Master's degrees in Computer Science in a wide array of specialisations. Some of the most popular specialisations and corresponding careers are:

- Video Games & Multimedia degrees - game tester, web designer
- Business Information Systems degrees - network engineer
- IT Security degrees - software developer
- Data Science degrees - database manager

Design Degrees

If you've always thought of yourself as a creative person that also has a keen eye for details, a Master's degree in Design might be the perfect fit for you. Designers focus on the appearance and physical aspects of a product without overlooking the functionality and usability and overcoming customer satisfaction. Designers are "the brain" behind every concept or idea of a logo, food package, website, and more. As a graduate, you can become:

- Graphics designer
- Copywrite visual artist

- Advertising editor
- UI/UX Designer

In the times when applications and websites play a big role in the digital marketing and business world, UI/UX designing is one of the most well-paid, new age careers of today. A UI/UX designer creates the interface for the best user experience for a mobile application or a website. Apart from graphic designing and knowledge of designing software, the basic skills needed to ace this profession are to have curiosity, empathy, and understanding of human behaviour and be adept at visual communication.

Fashion Degrees

Are you the kind of person who buys tons of fashion magazines and is deeply interested in fashion trends, clothing, and accessories? One can make a career out of this hobby and start with a Master's degree in Luxury Goods and Fashion or Master's degree in Fashion Design. These programmes can lead to rewarding careers like:

- Fashion designer
- Fashion journalist
- Fashion critic
- Brand manager

Art and Art History Degrees

If you were always passionate about anything that is related to arts like paintings, sculpture, visual arts, or even photography, you can learn more if you apply to a Master's degree in Art. If you study a Master's degree in Art History, you can understand how social, cultural, and even political factors have contributed to the ideas and work of famous painters and artists, in general. Popular career options include:

- Art critic
- Art broker
- Art consultant
- University professor

Social Sciences degrees - history, culture, politics, and economics

Social Sciences Master's degrees are some of the most versatile in terms of knowledge and skills, as they provide future graduates great career options. Top disciplines connected to Social Sciences are: Economics, International Relations, Political Science, and International Communication.

Your career options are wide-ranging and includes:

- PR officer for companies, institutions or political figures
- Economics analyst or freelance consultant for international business
- Counsellor, analyst, political journalist, lobbyist, or NGO activist

Hospitality Degrees

If you've experienced working in tourism, or have been attracted to the idea of making a career in this field, you can start preparing with a Master's degree in Tourism and Hospitality. The overall tourism industry is one of the most prosperous worldwide, and specialists in the field will always be in high demand. A Master's degree in Tourism and Hospitality will prepare you for jobs like:

- Restaurant or a hotel manager

- Customer service expert
- Tour and travel guide

Few other options one can explore are:

Blockchain Engineer

With Blockchain steadily growing into a popular part of the IT industry, the demand for blockchain engineers is also rapidly rising, making the field one of the exciting new-age career options for STEM aspirants. These engineers are hired to create and implement solutions for IT companies and various other companies of diverse industries using blockchain technology. A solid foundation of software development and proficiency in various programming languages is needed to become a high-flying blockchain engineer.

Artificial Intelligence Specialist

An Artificial Intelligence Specialist works towards supplementing the operations across industries. The plethora of opportunities available in the domain of artificial intelligence makes it an exciting domain.

Having made their mark in the financial, health as well as sports industries, there is a lot of potential to make their mark in sectors like law and geology. AI will be a formidable force moving into the new decade and it is believed that it has the potential to improve India's economy and cybersecurity.

Robotic Process Automation Consultant

Business Process automation is now being amplified by Robotic Process Automation. RPA can make a big difference for organizations troubled by repetitive everyday processes. RPA aims at speeding up the tasks, thus improving efficiency, resulting in higher client satisfaction. Automation is fostering a new way of operating. The organization will focus on a balance between the human and digital workforce, also known as software robots or "bots." The role of an RPA developer extends beyond automation and covers process design as well as automation architecture.

Growth Manager

Profit and revenue growth happens to be a core objective for most companies, and this requires each and every function to contribute towards the fulfilment of this goal. In regard to this, in recent years tech startups have introduced a new role in their structure, referred to as the Growth Manager. Synonyms for the same can be Growth Hacker, Growth PM, or Head of Growth, but the role stays the same. The function of a Growth Manager lies at the intersection of marketing and product development and focuses on the customer and user acquisition, activation, retention, and upsell. The Growth Manager works cross-functionally with engineering, design, analytics, product management, operations, and marketing to design and execute growth initiatives.

Site Reliability Engineer

The role of Site Reliability Engineering (SRE) was born at Google in 2003, before the DevOps movement, when the primary team of software engineers was tasked to form Google's already large-scale sites more reliable, efficient, and scalable. The practices they developed responded so well to Google's needs that other big tech companies, like Amazon and Netflix, also adopted them and brought new practices to the table. SRE eventually became a full-fledged IT domain, aimed toward developing automated solutions for operational aspects like on-call monitoring, performance and capacity planning, and disaster response. It complements beautifully other core DevOps practices, like continuous delivery and infrastructure automation.

Full-stack Developer

A full-stack developer is an engineer who can handle all the work of databases, servers, systems engineering, and clients. What customers need could also be a mobile stack, an internet stack, or a native application stack. In fact, "full-stack" refers to the gathering of a series of technologies needed to finish a project. "Stack" refers to a set of sub-modules. These software sub-modules or components combined together to realize the established function without the necessity for other modules.

Python Developer

A Python Developer is often an internet developer, programmer, Data Analyst, Data Scientist or an Automation tester, etc. And hence a Python Developer is often anyone of the above.

Question: Where was the first time you read or heard about Dr B R Ambedkar and what about him inspires you the most.

APARNA P M
MALAPPURAM

Dr. B. R. Ambedkar was the slightly bald man in a suit with round glasses in the picture chart of 'Freedom fighters of India' in my father's office room. If my memory is correct, I was in the fourth standard when I read about his life in the inspiring stories section of a children's magazine. The story said that he had to take turns with family members to sleep in his home as they had a single-roomed home, and he utilized the remaining time for his studies. Also, with his hard work and knowledge, he helped India gain independence by participating in the freedom struggle. During my upper primary social studies classes, I learnt about the difficulties he faced due to lack of money, the social stigma of untouchability and how he overcame those difficulties and became a scholar and the 'Father of the Indian Constitution'. He fought against all odds with the meager facilities and achieved great heights. Babasaheb Ambedkar's life has been an inspiration for generations. If we have the belief, determination and dedication we can break the social barriers and fly high.

NATIONAL EDUCATION POLICY 2020 ...

National Higher Education Regulatory Council (NHERC), a 'light but tight' regulator shall be the first institutional structure under the HECI, which will function as a single regulator for higher education including teacher education and excluding medical and legal education. Whereas, National Accreditation Council (NAC), a meta-accrediting body shall be the second institutional structure,

which will primarily function as a body to develop a robust system for accreditation. It will set the quality parameters such as basic norms, self-disclosure, governance, and outcomes for systematic growth of higher education institutions.

The third institutional structure will be Higher Education Grants Commission (HEGC), which will look after the funding and financing of higher education

institutions. The entire process shall be based on transparent criteria in which the Institutional Development Plan (IDP) prepared and implemented by an institution shall be examined. Whereas, the fourth institutional structure shall be the General Education Council (GEC) under the HECI. It will set expected learning outcomes for higher education programs. Accordingly, the process of National Higher Education Qualification Framework (NHEQF) has been initiated which will be synced with the National Education

Qualifications Framework (NSQF) with an objective to ease the integration of vocational education into higher education.

Overall, National Education Policy 2020 envisages building a legacy of traditional to modern education by broadly covering various aspects in school and higher education system with important reforms and foresees India as a 'Global Knowledge Hub' in the 21st Century. However, the effectiveness of NEP 2020 depends on its implementation, which will be done in a phased and time-

bound manner in coordination with all the stakeholders and most importantly review of various provisions of the policy frame-work at the ground level is must.

Simple access and increased demand are intriguing enough to become a Python Developer. The demand caters well for Job openings and being the one with the in-demand skills would assist you to stand out amongst your peers.

Lead Generation Specialist

Don't confuse this position with a requirement generation specialist that runs marketing automation programs. A lead generation specialist focuses on two main objectives: Calling leads passed to Sales from Marketing to make sure they meet the firmographic require-

ments necessary to elicit a sales call. Researching leads that meet the aforementioned requirements and interesting them so as to qualify them for sales. Both jobs are important. Within the lead flow process, someone must follow up with the opportunities

Data Scientist

A data scientist curates large amounts of unstructured data by using diverse programming languages, mathematics, and statistics. Companies hire data scientists to mine, present, and clean data, as well as source, manage and analyse the

unregulated data for insights, patterns, and trends that can be of use for businesses and other organizations.

Digital Marketing Specialists

Since such a big percentage of world commerce is digitalized, the opportunity to specialize in marketing online is also huge. Digital marketing specialists create online marketing campaigns to grow the engagement of a company via social media platforms, and the world wide web (www) so that it becomes open to new business from any part of the world. SEO, blogging, content marketing, etc are all components of a digital marketing campaign, used frequently by specialists.

Social Media Influencer

Social media influencing is probably one of the most lucrative new age careers for people who have a passion for social media, want to be their own boss, and love creating content. A social media influencer is someone who is paid to market for companies through their social media handles and blogs. Companies pay influencers to use their products and give honest reviews, ads to their audiences to increase sales.

Professional Gamers

Another new age career that is very popular today is that of a professional gamer. Companies often hire gamers to test their games on the basis of user experience, bugs, speed,

dialogues, and quality. They are paid to complete all levels of the game and submit a detailed review of it covering all factors that are important for a video game. It is definitely one of the careers that will define the next decade, with the growing popularity of virtual reality, video games, and consoles.

Critical thinking, problem-solving, people management, and creativity will continue to be the most preferred skills in the workplace. Employers want to see emerging professionals make hard decisions and showcase their leadership abilities. The institutions that uncover quality formulas for encouraging the development of these skills and making students more employable will have a competitive advantage within higher education. In my opinion, every education institution must offer requisite training to help students nurture and grow in the soft skill areas.

Needless to say, it is important to recognize that we have to prepare our students for the future of work and the nature of the future of work will be different. The important question we need to ask ourselves is, how well are we preparing students for the change?

Ensuring quality higher education is one of the most important things we can do for future generations- Ron Lewis

India, UK Agree to Conclude Free Trade Agreement by Year End

Prime Minister Shri Narendra Modi has said that India and the United Kingdom have decided to do their best to conclude the Free Trade Agreement (FTA) by the end of this year. Addressing a joint press briefing following bilateral talks with his UK counterpart Boris Johnson in New Delhi on 22nd April, PM Modi said, the teams of both countries are working on the FTA and good progress is being

made in the negotiations. Both leaders also discussed the developments taking place at the regional and global levels. Prime Minister Modi said, they emphasized maintaining the Indo-Pacific region based on free, open, inclusive, and rules-based order. Shri Modi said, they stressed dialogue and diplomacy in Ukraine for an immediate ceasefire and resolution of the problem. In his statement, the visiting Prime Minister Johnson said the partnership between India and Britain is one of the defining friendships of the times. He pointed out that since last year, the threats of autocratic coercion have grown even further and it is vital to deepen cooperation including a shared interest in keeping the Indo-Pacific open and free.

More than 77 Mn People Slipped into Poverty in 2021 Due to Pandemic: UN

The United Nations (UN) has said that more than 77 million people slipped into poverty in 2021 as governments struggled to service debts and secure early vaccine access. The UN report suggests that rich countries managed to avoid the worst economic impacts of the coronavirus pandemic but poorer ones continue to deal with debilitating debt. The report said 20% of the countries will not be able to return to pre-2019 levels of GDP per capita by the end of 2023. The poorest countries pumped billions into servicing debts and were forced to cut spending on education and infrastructure.
